- Diploma in Psychologie (1,1) – Universität Mannheim

Selected feedback from participants in 2017

- Let me also again thank you for the workshop yesterday. I got a lot of positive feedback from various participants, not only about how the concepts you presented will help them personally, but also how this had an impact on them feeling part of a team. Remember that “making us a stronger team” was one of my hopes/expectations!
- I just want to say thank you for the very good and inspiring workshop today. You managed in a perfect way to let us think about resilience and our options for interactions.
- Appreciate for your amazing lectures. All of us are inspired deeply.
- Thank you for your wonderful class. This is the most impressive course in my MBA program.
- I have only positive things to say, you gave us the best training ever!!!
- This morning, and it was not at first time, I recalled few practical advices from your course of Leadership, that we had at EBS University in Summer 2017. The concept that you have introduced, I recall quite often.
- Just want to say a massive thank you for the course I know I missed the third one due to other commitments but I genuinely really enjoyed it and got a lot from it and like I say it's good to already see people including myself using in the business.

- Your insights are really helpful, I wish we had this call much earlier
- The students thoroughly enjoyed your course and were highly complementary about your teaching style, your manner of interacting with them and engaging with them, and their overall learning from your course.
- I enjoyed the training and learnt a lot. Many thanks for that.
- Thank you also for your time and knowledge share during the training sessions, your use of real life experiences and humour made the course relatable, insightful and quite enjoyable. It is unfortunate I will not be able to attend the last session but I feel I am pretty well equipped with a good supply of techniques and management models to aid me my next role – thanks to you!
- I want to thank you all for the great work before and during the last week. We have accomplished a very complex, very intensive and for the participants a very engaging week of learning and development. It was only possible because of the great effort you all put into this week!
- Thank you for all the documents and for the past two days. I found it very insightful and extremely well structured with good exercises. In addition to the new knowledge it has also helped me better understand the team I am working with, which is very helpful!
